ReactJS NodeJS

FRONTEND DEVELOPER
05/2022 – 07/2022

OWS Software

ReactJS

INTERN
05/2020 – 10/2020

Rikkei Soft

HTML CSS JavaScript Python PHP

PERSONAL PROJECTS

ECG Process
2025

ML model to extract and analyze ECG signal. Through this, we can detect abnormalities in the heart rate and the risk of arrhythmia.

Python NumPy Pandas Matplotlib Scipy Pathlib

Credit Risking
2025

Simple ML model to evaluate the value of customer information fields and classify credit risk. Through this, we can support the decision to grant or not to grant a loan.

Docker Python Machine Learning Information Value Weight of Evidence Mathplotlib

Vision Guard / Vision Guard Edge
2026

Lightweight AIoT system for bus attendance, low cost including: Management system, backend dispatching, and Edge camera for face recognition of students directly on the bus.

Python FastAPI Computer Vision Face Recognition Edge AI AIoT Image Embedding

Food Moo Duu
2026

AI chat bot to ask what to eat today.

Python Chatbot LLM Semantic Analysis Rule-based Reforcement Learning

EDUCATION

MASTER OF SOFTWARE ENGINEERING IN AI
2025 – 2026

FPT School of Business & Technology

INFORMATION TECHNOLOGY (HEDSPI)
9/2016 – 9/2021

Hanoi University of Science and Technology

SPECIALIZED IN INFORMATION TECHNOLOGY
9/2013 – 6/2016

Lê Hồng Phong High School for the Gifted students in Nam Định

AWARDS

EXCELLENT STUDENTS CONTEST, NAM DINH PROVINCE – SILVER MEDAL IN THE INFORMATION TECHNOLOGY SUBJECT 2015, 2016

OLYMPIC HSG CHUYÊN ĐẠI HỌC QUỐC GIA HÀ NỘI – SILVER MEDAL IN THE INFORMATION TECHNOLOGY SUBJECT 2015

EXCELLENT STUDENTS CONTEST IN THE NORTHERN DELTA REGION – BRONZE MEDAL IN THE INFORMATION TECHNOLOGY SUBJECT 2014
